Our mission at Detroit Steel Wheel Co.

We are proud to keep manufacturing here in the U.S.A. in our home city of Detroit, MI.

Our formula for success is simple: hard work. Through building the highest quality product, and keeping our budget blue collar, our goal is to raise the standard for modern day street machines without breaking the bank.

We are the resuregence solution for manufacturing in the U.S.A.

Questions to Consider for the Right Fitment of Your Custom Wheels:

1. Is the vehicle bagged, lowered or stock ride height?
2. Does your vehicle have fender skirts?
3. Does the shape of your fender change or narrow at the top of the wheel well?
4. What size tires do you want to run and do those specs work with your wheel specs?
5. What is your current tire size?
6. What is your available overall height (wheel & tire)?
7. Will your new wheels clear your fender lip on the front and backside when you turn the steering wheel lock to lock?
8. How far out does your hub stick out (cap fitment)?
9. Do you want to be able to rotate your wheels?
10. What other modifications have been made to the vehicle? i.e. C-notch, tubbed, different chassis, different front or rear axles, narrowed axels, rolled fender lip, changed lug pattern, disc brake conversion, wheel spacers or adapters, etc.
Detroit Steel Wheel Co. works closely with Diamond Back Classic Tires and Vogue tyres, both leading white & gold wall specialty tire producers, for 18”, 20” and 22” tires.

Because of this strong relationship, Detroit Steel Wheel is proud to provide our customers with quality products at a discounted rate. Call us at 810.333.6100 to have our team quote you on a wheel & tire combo for your vehicle.

Featuring 18”, 20” and 22” in:
- White Walls
- Redlines
- Bluelines
- Goldlines
- Golden and whites

* Prices vary based on brand and size, typical set of white walls runs $1,200 to $1,300 per set, plus shipping.

Mounting and Balancing: Wheel & tires ship separately, customer is responsible for getting tires mounted & balanced locally.
